

We're a step ahead of payment processors

We partner with all major card networks to provide merchants a heads-up when a chargeback is coming down the pipeline.

We also program complex rules for early fraud warning so you can block transactions by high-risk customers, even before they chargeback.

Implemented Chargeblast

What does Chargeblast do?

We provide front-end and back-end chargeback alerts so you can refund customers before your payment processor records the chargeback on your account.

We've taken clients' dispute rates from **>2.0% to <0.1%.**

What sets us apart

- Fully automated alert-to-transaction matching and refunding via proprietary integrations and technology
- No-code builder for targeted refund rules so you never refund a dispute you wanted to challenge
- Higher payment authorization rates by 5%+ with our AI-driven fraud and chargeback alert optimization tool
- Lowest alert prices on the market and highest rated white-glove client service
- Coverage on PayPal, AMEX and Discover
