# Benefits

## 100% Uptime

Never Miss a Sale with State of the Art Processing Redundancy

## Lower administration & IT costs by 25%

The overhead of payments cost and effort is reduced as you enjoy the expert service team delivery

# Features

- **TRANSACTION SURCHARGING**

Move transaction costs to the customer invoice in an acceptable and compliant manner

- **FAILOVER PROCESSING**

Allow alternate MIDs to take over when you reach limits or processing accounts go offline. Automatically share traffic to the most suitable MID

- **DEEP DATA ON EVERY TRANSACTION**

OpenPath supply more information on each sale than any gateway or processor so that you can improve your business flow

- **DATA CLEANSING**

Maximize acceptance with data cleansing that matches processor requirements

- **INTELLIGENT CASCADING**

Give valid transactions a second chance

- **KNOW YOUR CUSTOMER**

The importance of understanding customers and their behaviour allows you to keep them delighted and buying more. We provide easy to access data on each customer purchase that will boost your customer service, and keep your payments safe

- **STOP UNWANTED TRAFFIC WITH GEOFENCING**

Eliminate gift cards or foreign cards to lower the risk of fraud and chargebacks. Plus Geo-fencing to allow sales only to valid markets
